# NATIONAL CLINICAL CHEMISTRY REFERENCE LABORATORY

## Our Services

The laboratory provides a wide range of biochemical tests, analysing electrolytes, enzymes, hormones and proteins in the blood, urine and cerebrospinal fluid. State-of-the-art instrumentation and stringent quality control measures enable quality-assured results reported in a timely manner. General and Immuno-Chemistry unit offers tests on general chemistry such as electrolytes, cardiac enzymes, liver function, lipids and glucose monitoring. Automated immunoassay analyzers enable accurate testing of hormones and tumour markers. Special Chemistry unit concentrates on glycated haemoglobin (HbA1c) measurement, neonatal screening, pheochromocytoma screening, renal calculi analysis, specialized protein testing and therapeutic drugs monitoring.
