

PHLEBOTOMY AND CENTRAL SPECIMENS RECEIVING AREA (CSRA)

Department of Laboratory Services

Phlebotomy Services provide blood collection for patients and public (medical fitness). This service is available at all four district hospitals. There are other Phlebotomy Services in Health Centres and Foreign Workers Health Screening Centre under Department of Community Health and Department of Public Health respectively.

Generally, patients are encouraged to go to their catchment area for blood draw except special tests that need to be taken in RIPAS Hospital as instructed by the doctor. Examples are sent abroad tests and coagulation studies (PT/INR).

Central Specimens Receiving Area (CSRA) is the Centre for receiving specimens from RIPAS Hospital, referral specimens from district hospitals and other Government Health Centres including MRS.

Services provided include receiving and registration of specimens, distribution of specimens to the respective laboratories within RIPAS Hospital and outside RIPAS Hospital, handling 24hr urine and preparing lab bills for paying patients.

Specimens for Histology and Cytology Laboratories Services are to be sent directly to the respective laboratories.
